

Local companies

Dla Studenta

Over the past several years, Opole has greatly increased its investment potential in many areas. One of the most important sectors of the local economy has no doubt been construction material manufacturing, particularly cement. The construction material and interior furnishing sector is currently experiencing dynamic growth, resulting in increasingly complex products.

It is also natural for a voivodeship capital with a strong and modern agricultural sector to have a booming food industry. Steady growth and new projects by food industry companies are evidence of the perfect conditions for this type of business. Colliers International called Opole a “Rising Star” on the BPO/SSC market. The main advantages of the city in this regard include great conditions for investments, high availability of human resources, highly skilled work candidates and a developing modern office market. Companies from this sector can also expect to receive support from the local universities.
