

Kids&Fun Fair

For children

This has got to be the most colourful and happy fair not only in Opole, but in the entire region as well. The Exhibition and Congress Centre transforms into a children's paradise.

Kids&Fun is most importantly a great opportunity for companies to establish business relations and acquire new clients and partners. It is also a great event for families, who can have a great time and look for inspiration on how to organise creative entertainment for their children after they come back from kindergarten or school.

The fair is an opportunity to purchase fantastic products and gadgets for children, including hand-made sweets, accessories, board games, robots and creative toys. Take smart plasticine, for example – it is a mass that stretches, tears like paper and falls apart like porcelain or Swedish kinetic sand.
