

IFM Ecolink

Industry

IFM Ecolink is an industry automation solutions manufacturer with an R&D centre located in Opole. IFM electronic geräte gmbh+co kg was born with the development of 220 V inductive proximity sensors used for direct contactor triggering, The company now offers a broad range of products, including all necessary standard solutions and specialised components which meet very specific needs of various sectors of the industry. In addition to position and process sensors, the company also manufactures sensors for motion control and safety technology solutions, as well as industrial imaging, communication, identification and mobile machine systems. In addition, IFM has been developing an increasing number of Industry 4.0 solutions.
