

Heerema Fabrication Group

Industry

HFG is a global leader in designing and building offshore oil and gas platforms. The company's main clients are leading energy companies from around the globe. HFG also has branch offices in the United Kingdom and the Netherlands. The Opole branch was established in the industrial part of the city – Metalchem, located near the port on the Oder, in 2008. In 2013, the company erected a new production plant with a total area of 4000 m² – an eco-friendly building utilising renewable energy sources. The new plant employs 150 people.
