

PZ Stelmach

PZ Stelmach is a goldsmithing company specialising in precious metal products for the domestic and European market. The workshop was established in 1919. Initially, the company manufactured gold and silver jewellery, adapting over time to the needs of the market and specialising in wedding rings after 1989. PZ Stelmach originally manufactured jewellery manually, which was an invaluable source of experience. In addition to traditional methods, the company has also been implementing the latest in CNC solutions.
