

Selt

Industry

SELT SUN PROTECTION SYSTEMS was established in 1980. The company specialises in internal and external sun protection systems. Selt is a modern and innovative business operating a 61,000 m² facility comprising production lines, warehouses, laboratories and offices. In 2011, the company acquired its own powder coating line, and 2013 saw the construction of a new building with a total office, production and warehouse space of 31,000 m². The company provides its systems to both Polish and foreign clients, including clients from Germany, Austria, Belgium, Switzerland, Sweden, Norway, Denmark, United Kingdom, France, Italy, Cyprus, Russia, Ukraine, Kazakhstan, Australia and Japan. Selt manufactures systems which protect interiors from overheating. The final stage of the construction project cost PLN 70 million.
